### Ultra-short bio

Wiemer Salverda is Director of the Amsterdam Institute for Advanced Labour Studies (University of Amsterdam) and Professor of Labour Market and Inequality. He coordinates the international research project *Growing Inequalities' Impacts* **GINI**, and managed the *European Low-wage Employment Research Network* **LoWER** (1996-2008). He has contributed extensively in writing on comparative wages, employment, and inequality, and served as an expert for the European Commission, the OECD and the ILO.

### Short bio

Dr Wiemer Salverda is a macroeconomic labour economist. He is the Director of the interdisciplinary Amsterdam Institute for Advanced Labour Studies AIAS of the University of Amsterdam and also holds a special chair on Labour Market and Inequality at the Amsterdam Center for Inequality Studies AMCIS in the Faculty of Social and Behavioural Sciences. He coordinates the international EU-funded research project *Growing Inequalities' Impacts* **GINI** (2010–2013) and previously coordinated the successful *European Low-wage Employment Research Network* **LoWER** from inception to expiry (1995–2008; EU funded by FP4, 5 and 6 respectively). The network has published 16 books, special journal issues and reports, the latest of which – jointly with the Equalsoc network – is the *Oxford Handbook of Economic Inequality* with the world's top-ranking authors considering many important angles. He chairs the Governing Council of the EQUALSOC Network of Excellence. He coordinated the *Demand Patterns and Employment Growth* (FP5) and *Benchmarking Low-wage and High-wage Employment* (EU tender) research projects. The results of the former were published by Princeton UP (Gregory *et al.* 2007), including important contributions by Victor Fuchs, William Baumol and Robert Gordon. He was an active joint coordinator of the Russell Sage Foundation's *Low-wage Work in Europe* project, led by Nobel Laureate Robert Solow, and he took part in various EU Expert Working Groups and acted as a Rapporteur of the EU/OECD conference on Wages and Employment (1997). He advised the OECD on wage inequality in the Netherlands (1993), the British Low Pay Commission, and several ILO/EU Expert Working Groups, on the Minimum wage and on Inequalities in the world of work: The effects of the crisis. He took part in the OECD's *Older Workers* project for the Netherlands and advised on *Jobs for Youth* and *Jobs for Immigrants*. Other research interests concern wage inequality and low pay in a broad setting (including the role of employers and institutions), wage formation including the minimum wage, pay inequalities such as between the private and public sector, labour-market policies, education and work, the workings of the Dutch 'Polder model', top incomes, income inequality and the (gendered) labour market. More detail can be found at <http://www.uva-aias.net/cpages/staff/2008?controler=cpages&lang=en>.
